

Audio Accessories

Headset with Swivel Boom Microphone

Ideal for noisy work areas or to avoid disturbing those around you. This rugged headset also allows for hands-free operation.

Part #53865

Remote Speaker Microphone

Talk and listen without reaching for your radio. Clips on shirt or collar.

Part #53862

Ear bud with PTT Microphone

Push-to-Talk button means you can communicate without removing the radio from your belt. Ear bud fits in ear comfortably. Microphone attaches to collar or sleeve.

Part #53866

Earpiece with Microphone

Fits over ear for clear reception even in noisy areas and allows for hand-free operation.

Part #53863

Ultra light Headset with Boom Microphone

Ideal for fast-paced work environments. Enables discreet operation.

Part #53815

Lightweight Temple Transducer Headset

Lightweight headset allows users to hear both radio audio and their surrounding environment. Two temple receivers convert audio into sound vibration and transmit into the inner ear without covering the ear. Includes a noise-cancelling in-line microphone with replaceable windscreen.

Part #RMN5114

Earpiece with Boom Microphone

Ideal for fast-paced work environments. Enables discreet operation.

Part #56518

Earpiece with Inline PTT Microphone

Convenient earpiece enables communication without removing the radio from its holster. Push-to-talk button activates microphone when you're ready to speak.

Part #56517

E1- EA2MS131 - SUGGESTED LIST PRICE \$44.95

For Use with Motorola CP200, CP150, BRP40, PR400, XTN, RDX, CLS, DTR & AX Series Business Radios

OTTO sets the standard in durability, reliability and performance for low-profile earphone kits. Maintain high-clarity, two-way radio transmissions that are unnoticed by others around you. Not just for "surveillance" purposes anymore, the 1 Wire Monitoring Kit is also perfect for security at airports, casinos, crowd control at conventions and concerts and retail and hospitality environments requiring discrete communications.

Features:

- Lightweight single cord with In-Line microphone and PTT
- Quick disconnect earphone adapter for easy replacement of any one component
- Low-profile, flexible, transparent acoustic tube
- Flexible, high-grade, Kevlar reinforced cable for demanding applications
- Available in black
